- English (Fluent)

PROFILE

Innovative Full-Stack Developer specializing in front-end engineering, with a passion for turning ideas into intuitive, high-performance web experiences. Proficient in React, Next.js, Node.js, Tailwind CSS, MongoDB, Inngest, Clerk, and API integration, with a portfolio that includes e-commerce platforms, real estate websites, and dynamic media applications.

I approach every project as an opportunity to design, build, and optimize products that are both seamless in functionality and exceptional in design.

WORK EXPERIENCE

Freelance Front-End / Full stack Developer   2024 - PRESENT

- **QuickCart** — E-commerce Platform: Developed a responsive online store with role-based authentication (buyer/seller), dynamic product catalog, secure checkout, and order tracking using React, Tailwind CSS, Mongo DB, Inngest.
- **Real Estate Company Website:** Designed and built a property listings site with advanced search, image gallery, and agent contact forms using React and Tailwind CSS, ensuring responsive layout and cross-browser compatibility.
- **Photographer Portfolio:** Created a visually appealing, SEO-optimized portfolio site with responsive image grids, lazy loading, and accessibility features for improved user experience.
